A Short History

- As far as I can recall, first came up during a breakout session at Code4lib 2006
- The idea kicked around for a while with people offering to do certain parts
- Didn't take off until someone (Jonathan Rochkind) decide to take the ball and run with it

Roy Tennant on Code4lib

“If you want to participate, just do it. If you want to lead, just do it. Don't expect anyone to appoint you to anything, because we won't. If you see something that should be done, simply step forward and do it.”

Background

- Agile development' philosophy
 - Don't over-engineer complicated rules and procedures you might never need
 - Make it up as you go along
